

## The "3P" Key Elements of PERMAGARD

### PERMANENT

- Seals and locks in the paint finish and clear coat
- Completely bonds to the external surface
- Eliminates the need to cut and polish
- Easy to maintain

### PERFORMANCE

- Improves performance by reducing drag
- Dramatically reduces maintenance time & cost
- Outstanding long-term and wet-look effect
- Saves water and is environmentally sound
- No soap required to wash treated cars

### PROTECTION

- Protects against fading and oxidization
- Maintains asset value
- Does not contain wax or silicates
- Will not create re-paint problems
- ISO-14001 (Environment), OHSAS-18001 (Health and safety), and ISO-9001 (Quality)

## WHY CHOOSE PERMAGARD?

### ULTRA GLOSS

"Glass-like" finish over and above factory paint scheme.

### ULTRA VIOLET INHIBITING TECHNOLOGY

Guarantees gloss and paint won't fade and oxidize.

### REDUCED MAINTENANCE

Self-cleaning properties, repels dirt and grime, thus making your vehicle easier to wash with no need to wax or polish.

### STAIN RESISTANCE

Permagard acts as a durable sacrificial layer that chemically bonds to your paint, and the first line of defense against environmental attacks, such as bird droppings, tree sap, and industrial fallout.

### PAINT COMPATIBLE

Permagard coatings are 100% paint compatible, containing no silicone additives or abrasives that can damage paint.

## PERMAGARD, THE COMPANY.

Permagard is an industry leader and standard in paint protection technology. We have protected over thirty-five billion dollars' worth of aircraft, automobiles, and yachts globally.

Our company specializes in the manufacturing and distribution of high-performance, aviation-grade protective coating products that have been engineered to perform in the toughest of environments worldwide.
