

UNRIVALED AVIATION PAINT PROTECTION

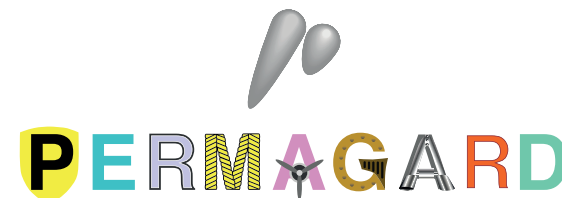

PERMAGARD Aviation Coating durably seals and protects all external painted surfaces, including aircraft wings and helicopter rotor blades.

PERMAGARD Aviation Coating manufactured in the USA:

- Ensures an aircraft looks as good as new for up to 15 years
- Extends aircraft repaint intervals up to 15 years
- Provides best stable aerodynamic characteristics of the wing
- Reduces maintenance costs

These benefits, individually and combined, translate into significant savings for the operator. The greatest value, however, lies in the communication of the corporate brand's image as a superior product compared to its lackluster competition.

SINCE 1998

PERMANENT

- Seals the external finish
- Glossy and slick to the touch
- No need to polish
- Never needs to be compounded

INTERIOR PROTECTION

PERMAGARD offers the very best interior protection for all aircraft. Our Leather & Fabric Protector, and Plastic & Vinyl Protector, ensure that your beautiful cabin will be preserved in the same condition as the first day you walked into it.

Our interior products' shining benefits include:

- Stain resistance
- Hydrophobic properties
- Easy cleaning
- Protection against UV rays to prevent fading
- Restores vivid colors and refreshes the surface
- Creates a smooth, silky finish for feel and comfort

PROTECTION

- Protects against fading and oxidation
- Eliminates swirl marks
- Does not contain wax or silica
- Does not create repaint problems

PERFORMANCE

- Reduces drag and improves performance
- Saves maintenance cost and ground time
- Restores and revitalizes paint & clear coats
- Exceptional, long-lasting shine

PERMAGARD

PERMAGARD is the market leader in aviation paint rejuvenation and protection. With the aid of our aviation-grade proprietary formulas, we have the most effective and durable aviation paint preservation system available.
