UNRIVALED AVIATION PAINT PROTECTION

A close-up photograph of a blue aircraft wing with a yellow section, featuring a "22T GTS" label.

The PERMAGARD Aerospace Coating durably seals and protects all external painted surfaces, including aircraft wings and helicopter rotor blades.

The PERMAGARD Aerospace Coating is handmade and manufactured in Miami, Florida, USA, with American-made raw materials under an ISO 9001 Quality Management System.

Key benefits include:

- Pristine brand new appearance for up to 15 years
- Extends aircraft repaint intervals up to 15 years
- Provides best stable aerodynamic characteristics for aircraft wings
- Greatly reduces maintenance costs and downtime

These benefits, individually and combined, translate into significant savings for the operator. The greatest value, however, lies in the communication of the corporate brand's image as a superior product compared to its lackluster competition.

SINCE 1998

PERMANENT

- Seals the external finish
- Deep depth of gloss and shine
- Greatly improves paint slickness
- No paint correction required

SERVICE TREATMENT

Maintaining the PERMAGARD Coating is a simple and efficient process for both the aircraft owner and the PERMAGARD-certified applicator.

Every 11-13 months, the PERMAGARD Service Treatment is applied to deep clean the PERMAGARD Coating, fill in micro-scratches on the treated surfaces, and restore any areas that may have been impacted by environmental attacks to keep the PERMAGARD Coating in good standing.

The PERMAGARD Maintenance Program elevates aircraft finishes beyond preservation—delivering increased gloss readings year after year, for a surface that becomes ever more luminous and refined, in stark contrast to untreated paint that inevitably dulls with time.

PROTECTION

- Protects against fading and oxidation
- Eliminates swirl marks
- Does not contain wax or silica
- Does not create repainting issues

PERFORMANCE

- Reduces drag and improves performance
- Saves maintenance costs and downtime
- Restores and revitalizes paint & clear coats
- Exceptional, long-lasting gloss and shine

PERMAGARD

PERMAGARD is the market leader in aviation paint rejuvenation and protection. With the aid of our aviation-grade proprietary formulas, we have the most effective and durable aviation paint preservation system available to fully protect aircraft paint thickness.
